Policy Statement

We believe the safety and wellbeing of children who are at risk of anaphylaxis is a whole-community responsibility. We aim to provide an environment which is safe and healthy where children at risk of anaphylaxis can participate equally in all aspects of the programs and experiences offered at the service. We will ensure all educators are equipped with adequate knowledge and training of allergies, anaphylaxis, and emergency procedures to enable them to respond immediately and appropriately.

Procedure

At least one educator, who has undertaken approved anaphylaxis management training (Reg. 136) will be present at all times that children are being educated and cared for at the Centre.

All staff will be required to undergo approved Anaphylaxis Management training, as specified by the Australian Children's Education and Care Quality Authority (ACECQA). Training will be updated every 3 years as required.

Parents will be required to inform the Centre of any child diagnosed by a medical practitioner as being at risk of anaphylaxis, at the time of enrolment. This information is recorded on the enrolment form.

Parents are reminded of this requirement through the Family Handbook.

Parents will be required to provide a colour copy of the ASCIA Anaphylaxis Action plan with current colour photo attached, as authorised by the medical practitioner (Regulation 90). Permission will be required from parents to have the action plan displayed in a location visible and accessible to educators responsible for the child.

Any medication required such as an adrenalin pen or antihistamine must be supplied by the parents and clearly marked with the child's name and any additional relevant information must be kept with the medication at all times.

The Centre Director will ensure that any child who has been prescribed an adrenalin pen is only allowed to attend the centre if their medication has been made available to educators on shift.

All medication must be stored in an area easily accessible to educators but inaccessible to children and away from any direct heat source.

When off school grounds, any adrenalin pens for children on the excursion must be carried and administered only by educators adequately trained in anaphylaxis management.

All educators, including relief educators and volunteers, will be informed of the current enrolled children who have been diagnosed with anaphylaxis upon employment. Educators will be responsible for familiarising themselves with the children diagnosed.

In the event of an anaphylactic reaction occurring where a child has been diagnosed at risk of anaphylaxis, educators will follow the instructions on the child's action plan.

In the event of an anaphylactic reaction occurring where a child has been diagnosed as only being allergic, educators will:

- Call an ambulance immediately "000"
- Commence first aid measures
- Contact the parent/guardian
- Contact the person to be notified in the event of illness if the parent/guardian cannot be contacted

Medication may be administered to a child without an authorisation in case of an anaphylaxis emergency (Regulation 94). If medication is administered under this regulation, the approved provider or nominated supervisor of the education and care service must ensure that the following are notified as soon as practicable:

- a parent of the child
- emergency services

Educators must ensure that all anaphylaxis medication administered is recorded in a medication record.

Parents/guardians of children diagnosed as being at risk of anaphylaxis must be provided with a copy of the Anaphylaxis Policy on enrolment (Regulation 91).

If parental permission is given, the Centre can notify the other families using the service of a child at risk of anaphylaxis being enrolled in the service (Regulation 173). The child's name will not be mentioned. This can be done in the newsletter and will be displayed on the noticeboard.

If relevant, policies and practices in relation to specific needs of individual children will be developed and implemented.

Food Allergies

If a child has been diagnosed as being at risk of anaphylaxis directly relating to certain foods:

- Parents will be required to provide an outline of the child's current diet on a Severe Allergies Form (see D-15 Allergies Policy)
- A listing of children with food restrictions will be placed in the kitchen to alert educators
- A list of what the child cannot eat will be recorded, as well as alternatives of what the child can consume
- All educators are to make themselves aware of the record on an ongoing basis

Practices and procedures in relation to safe food preparation and consumption will be reviewed each time an enrolment for a child with a risk of anaphylaxis is accepted at the centre.

Normanhurst OSHC is currently a nut-free centre in line with the anaphylaxis requirements of attending children. Where possible, the Centre will reduce the risk of exposure to allergens and provide alternatives during mealtimes where an allergen may be present.

Any educators who have been diagnosed as being at risk of anaphylaxis by a medical practitioner must advise the Centre Director. This will be recorded on their staff details form and any additional information recorded on file.
